MINTZ LEVIN COHN FERRIS GLOVSKY AND POPEO PC 12010 SUNSET HILLS ROAD SUITE 900 RESTON, VA 20190			EXAMINER LEWIS, CHERYL RENE A	
			ART UNIT 2167	PAPER NUMBER

DATE MAILED: 02/24/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/632,105	Applicant(s) KIESSIG ET AL.	
	Examiner Cheryl Lewis	Art Unit 2167	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 August 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-32 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-32 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 01 August 2003 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Claims 1-32 are presented for examination.

PRIORITY

2. Applicant has complied and receives the benefit of priority of an earlier filing date to application 60/434,418 filed December 19, 2002.

Drawings

3. Drawing figures 1 and 5 are objected to under 37 CFR 1.84(m) because they fail to show the necessary textual description stated in the drawing figures of figures 1 and 5. The textual description is not visually readable because of the black shading on the drawing figures. For instance, figure 5, element 525 illustrates 'volume', however the illustration of 'volume' is not visually readable because of the black shading. Section 37 CFR 1.84(m) of the MPEP states that solid black shading is not permitted. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the

Art Unit: 2167

appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

INFORMATION DISCLOSURE STATEMENT

4. The information disclosure statements filed on May 4, 2004, complies with the provisions of MPEP § 609. They have been placed in the application file, and the information referred to therein has been considered as to the merits.

Specification

5. The disclosure is objected to because of the following informalities:

The applicants must provide serial numbers for the related applications indicated on page 1, paragraph [01] of the specification.

Appropriate correction is required.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1, 3, 5-14, and 16-29 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 6-11, 13, 14, 18, 19, 21, and 22 of copending Application No. 10/632,087; unpatentable over claims 1, 10, 36-43, 45, 47, 48, 50-54, and 62-64 of copending applications No. 10/632,092; unpatentable over claims 1 and 46 of copending application No. 10/632,086. Although the conflicting claims are not identical, they are not patentably distinct from each other because independent claim 1 and dependent claims 3, 5-14, and 16-29 of the instant application (10/632,105) contains claim limitations found in (1) independent claim 1 and dependent claims 6-11, 13, 14, 18, 19, 21, and 22 of copending application 10/632,087; (2) claim limitations found in independent claim 1

and dependent claims 10, 36-43, 45, 47, 48, 50-54, and 62-64 of copending application 10/632,092; and (3) claim limitations found in independent claim 1 and dependent claim 46 of copending application 10/632,086.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 101

8. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

9. Claim 1 is rejected under 35 U.S.C. 101 because claim 1 is directed to a system of managing multiple versions of electronic files which is an abstract idea or the mere manipulation of an abstract idea.

10. The claimed invention is directed to non-statutory subject matter because according to claim 1 the language of the claim raises a question as to whether the claim is directed to an abstract idea that is not tied to a technological art. According to the claim, a volume manager manages electronic files and metadata relating to files on one or more volumes and version control means to manage file versions based on opening, saving, and changing electronic files, this is non-statutory for at least the reason that it is not tangibly embodied in a manner so as to be executable. It appears that the claimed method of file management having a volume manager to manage multiple versions of electronic files based on the file volume is non-functional descriptive material.

Abstract ideas, Warmerdam, 33 F.3d at 1360, 31 USPQ2d at 1759, or the mere manipulation of abstract ideas, Schrader, 22 F.3d at 292-93, 30 USPQ2d at 1457-58, are not patentable. Claims to processes that do nothing more than solve mathematical problems or manipulate abstract ideas or concepts are more complex to analyze. If the “acts” of a claimed process manipulate only numbers, abstract concepts or ideas, or signals representing any of the foregoing, the acts are not being applied to appropriate subject matter. Schrader, 22 F.3d at 294-95, 30 USPQ2d at 1458-59. Thus, a process consisting solely of mathematical operations, i.e., converting one set of numbers into another set of numbers, does not manipulate appropriate subject matter and thus cannot constitute a statutory process. In practical terms, claims define nonstatutory processes if they:

- consist solely of mathematical operations without some claimed practical application (i.e, executing a “mathematical algorithm”); or
- simply manipulate abstract ideas, e.g., a bid (Schrader, 22 F.3d at 293-94, 30 USPQ2d at 1458-59) or a bubble hierarchy (Warmerdam, 33 F.3d at 1360, 31 USPQ2d at 1759), without some claimed practical application.

Claim 1 is not limited to tangible embodiments. To overcome this type of 101 rejection the claims need to be amended to include only tangible embodiments (e.g., ‘computer implemented method comprising’, processor, computer readable media, memory, etc.). The applicants have a practical application, however this application is not producing tangible results. As a suggestion, the applicants may consider amending the preamble of claim 1 to recite: “A computerized file management system for

managing multiple versions of electronic files on one or more volumes, the file management system comprising.”

Claim Rejections - 35 USC § 103

11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

12. Claims 1-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sitka (Pat. No. 6,330,572 B1 filed July 15, 1999) and Brechner et al. (Pat. No. 6,741,996 B1 filed April 18, 2001, hereinafter Brechner).

13. Regarding Claim 1, Sitka teaches hierarchical data storage management.

The method and associated system for hierarchical data storage management as taught or suggested by Sitka includes:

a volume manager (figure 2, element 52) that manages the electronic files and metadata relating to such files (col. 17, lines 23-26) on one or more volumes (col. 14, lines 25-62).

However, Sitka does not expressly teach version control of an electronic file through the file management system based on opening, saving and changing of a file.

Brechner teaches version control of an electronic file through the file management system based on opening, saving and changing of a file (figure 7, element

Art Unit: 2167

232 'Add Clips To Organizer', and element 236 'Ok', figure 9, and figure 12, element 358 'Restore').

It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the metadata files of Sitka's method with the metadata files of Brechner's method because Brechner's metadata files could enable the metadata files of Sitka's method to comprise an automated update feature, the automated update feature enables the hierarchical collection of media clips associated with metadata files to be updated as changes to the hierarchical collection of files becomes imported files and additional files added or deleted from the collection.

14. Regarding Claim 2, Brechner teaches a user interface that enables a user to view, within the file management system, one or more versions of the electronic files (figure 4, elements 104-160, col. 8, lines 39-67).

15. Regarding Claim 3, the limitations of this claim has been noted in the rejection of claim 1 above. In addition, Brechner teaches a native application (col. 6, lines 55).

16. Regarding Claim 4, Brechner teaches the system keeps a record of what was done, by whom, when, why and other desired information (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

17. Regarding Claim 5, Brechner teaches the means which essentially comprises the same means as a show history feature (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

18. Regarding Claim 6, Brechner teaches a view history feature that enables a user to view what used to be in folder but was deleted or moved (figure 2, element 110, and figure 11, element 332).

19. Regarding Claim 7, Brechner teaches a user interface enables a user to open and explore what used to be in a folder but was deleted or moved and to Undelete or Bring Back changed content (figure 11, elements 320-342, and figure 12, elements 350-362).

20. Regarding Claim 8, Brechner teaches an Undo feature (figure 7, element 240).

21. Regarding Claim 9, Brechner teaches a dialog box in the user interface that brings up changes to a file or folder and an option to undo one or more changes to a file, folder, or hierarchies (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

22. Regarding Claim 10, Brechner teaches a system enables an As of View (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

23. Regarding Claim 11, Brechner teaches the means which essentially comprises the same means as a user to freeze files or folders such that a user cannot modify such files or folders, and cannot modify tags associated with the frozen files or folders (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

24. Regarding Claim 13, Brechner teaches the version control includes a Show Versions feature that displays all past versions, frozen files and provides a make current option (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

25. Regarding Claim 14, Brechner teaches the means which essentially comprises the same means as a Snapshot feature (figure 12, element 358).

Art Unit: 2167

26. Regarding Claim 15, Brechner teaches automatically managing copies of electronic files through the file management system (figure 10, col. 14, lines 9-67, col. 15, lines 1-55)

27. Regarding Claim 16, Brechner teaches copies include Smart Copies, Live Copies, and Deferred Copies (figure 12, element 358).

28. Regarding Claim 17, Brechner teaches Live Copies of files A and B initially refer to the same underlying data, and changes in one are reflected immediately in the other and deleting one has no effect on the other (figure 12, element 358).

29. Regarding Claim 18, Sitka teaches different volumes and managed via the coherency manager (figure 2, element 52).

30. Regarding Claim 19, the limitations of this claim has been noted in the rejection of claims 1 and 17 above. It is therefore rejected as set forth above.

31. Regarding Claim 20, the limitations of this claim has been noted in the rejection of claims 1, 16, and 19 above. It is therefore rejected as set forth above.

32. Regarding Claim 21, Brechner teaches the system allocates new space for a file or folder when a new/modified copy is needed (col. 4, lines 34-67).

33. Regarding Claim 22, the limitations of this claim has been noted in the rejections of claims 9 and 13 above. It is therefore rejected as set forth above.

34. Regarding Claim 23, the limitations of this claim has been noted in the rejection of claims 1, 9, 13, 16, and 19 above. It is therefore rejected as set forth above.

Art Unit: 2167

35. Regarding Claim 24, the limitations of this claim has been noted in the rejection of claims 1, 16, and 19 above. In addition, Brechner teaches a display of a hierarchy (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

36. Regarding Claim 25, the limitations of this claim has been noted in the rejection of claims 1, 14, and 25 above. It is therefore rejected as set forth above.

37. Regarding Claim 26, Brechner teaches a versions feature enables versions to be marked as special, enables versions to appear in folders as regular files and icons in a user interface show which files are versions (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

38. Regarding Claim 27, Brechner teaches old versions to be displayed (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

39. Regarding Claim 28, Brechner teaches versions feature enables new versions to inherit metadata from previous files (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

40. Regarding Claim 29, the limitations of this claim has been noted in the rejection of claim 11 above. It is therefore rejected as set forth above.

41. Regarding Claim 30, Brechner teaches a repository folder that manages automatic file check-out and check-in (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

42. Regarding Claim 31, Brechner teaches automatically renames an old version of a file or folder to prevent naming collisions (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

Art Unit: 2167

43. Regarding Claim 32, Brechner teaches the system maintains and displays a copy pedigree that is used to track copies and versions of files (figure 10, col. 14, lines 9-67, col. 15, lines 1-55).

44. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sitka (Pat. No. 6,330,572 B1 filed July 15, 1999) and Brechner et al. (Pat. No. 6,741,996 B1 filed April 18, 2001, hereinafter Brechner) as applied to claim 1 above, and further in view of Nishino (Pat. No. 6,055,534 filed July 19, 1996).

45. Regarding Claim 12, Sitka does not teach the use of a hash code.

Nishino teaches computing a hash code (col. 7, lines 54-64).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the file management method of Sitka with the file management method of Nishino because Nishino's file management method comprises managing file attribute information with an attribute list, the attribute list enables files to be updated based on predetermined time intervals when a user requests to update a file's content.

Brechner does not computing the use of a hash code.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the predetermined trigger events with metadata files of Brechner's method with the predetermined time intervals of Nishino's method because Nishino's predetermined time intervals could enable Brechner's metadata files to comprise a time period for when metadata files are imported, changed, deleted, or browsed.

NAME OF CONTACT

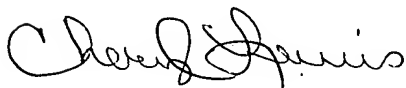

46. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cheryl Lewis whose telephone number is (571) 272-4113. The examiner can normally be reached on 6:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jean Homere can be reached on (571) 272-3780. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

(571) 273-4113 (Use this FAX #, only after approval by Examiner, for "INFORMAL" or "DRAFT" communication. Examiners may request that a formal paper/amendment be faxed directly to them on occasions.).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist/ Technology Center (571) 272-2100.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
